1. Overview of Operating Results, etc.

(1) Overview of Operating Results for the Fiscal Year Ended March 31, 2017

1) General overview

During the fiscal year ended March 31, 2017 (from April 1, 2016 to March 31, 2017), net sales for the Group achieved a year-on-year increase of 10.6% as a result of sales growth in our core business of SR Consulting, due to growing needs for consulting services related to the implementation of the Corporate Governance Code by companies, as well as business reorganization and corporate control (voting rights), in addition to the start of full-scale operation of the investment banking business. In terms of profits, operating income and ordinary income each registered year-on-year growth of 29.4%, respectively. This was attributable to our efforts to improve added value and efficiency in SR Consulting and an increase in the number of profitable projects in the investment banking business. Profit attributable to owners of parent increased 56.1% year on year to ¥694 million, due to the posting of ¥96 million in reversal of provision for directors' retirement benefits under extraordinary income and ¥80 million in provision of allowance for doubtful accounts and other items under extraordinary losses.

2) Net sales by type of service

The Group is engaged in the consulting business specializing in IR/SR activities, which constitutes a single business segment. An overview of net sales by service type is as follows.

(Millions of yen)

Service	Fiscal 2016 (April 2016 to March 2017)			Fiscal 2015 (April 2015 to March 2016)

IR/SR Consulting

IR/SR Consulting is the Group's core lineup of services, including shareholder identification surveys, proxy voting simulation, proxy advisory (comprehensive strategy planning for shareholder meetings), the investment banking business, and the stock transfer agency business.

During the fiscal year under review, net sales from IR/SR Consulting increased 14.2% year on year. In the business environment in which IR/SR Consulting operates, the implementation of the Corporate Governance Code by listed companies has been completed, and a growing number of companies are looking into ways to improve issues from the first year and to strengthen their compliance with the Code. In addition to the rise of domestic activists, overseas activists have begun full-scale activities in Japan. More companies are working to understand risk by conducting shareholder identification surveys more frequently and carry out approval/disapproval simulations of proposals prior to general meetings of shareholders. Furthermore, the seminars we held on evaluating the effectiveness of the board of directors and on executive compensation systems utilizing stock (Restricted Stock, Performance Share), which are the topics of greatest interest to companies implementing the Corporate Governance Code, have been attended in full. Response has also been strong for the "ID (Independent Director) – Search" website we set up as part of our services to address the growing need for referral of independent outside director candidates. We are receiving an increasing number of inquiries from both existing and new clients for unique consulting services offered by the Group with its advanced expertise.

The investment banking business has expanded both in terms of organization and operation during the fiscal year under review. M&A advisory services, which are the Group's focus, have steadily accumulated a track record including the conclusion of numerous entrustments. The Group is also seeing expansion of its distinctive project pipeline, including an increase in consultations and project referrals from existing clients, legal offices and major financial institutions due to gradual growing recognition of the Group's investment banking business. The Group provides a wide range of solutions, including behind-the-scenes resolutions that avoid proxy fights, in its traditional proxy advisory (PA) services, which continue to receive many consultations based on the trust we have built through our overwhelming track record. The Group's investment banking business will continue to enhance its presence as the external environment sees greater changes in the future.

In the stock transfer agency business, as of May 15, 2017, entrustments with 46 companies have been completed, and the number of shareholders under administration reached 252,314 (compared with entrustments concluded with 40 companies and 197,453 shareholders under administration in the same period of the previous fiscal year). The Group has steadily increased its number of entrustments by concentrating its approach on growth companies that have large fluctuations in the number of shareholders, where the strengths of the Group's stock transfer agency business can be leveraged, and by promoting the Group's flexibility. Synergies have steadily emerged among IR/SR Consulting services such as in proxy fights and in securing a quorum and affirmative votes at general meetings of shareholders, where the Group has an overwhelming track record. The Group aims to utilize its unique strengths to further expand the stock transfer agency business in the future. Meanwhile, we will continue to thoroughly enhance risk management of the stock transfer agency business.

Disclosure Consulting

Disclosure Consulting consists of IR tool consulting services (support for the planning and creation of various disclosure documents required for IR activities, including annual reports, integrated reports, and shareholder newsletters) and legal documentation services (the creation of a variety of disclosure documents in English and the translation of such documents from Japanese to English in connection with business reorganization and M&As).

Sales from Disclosure Consulting for the fiscal year under review declined 2.5% from the previous fiscal year. However, as a result of continuing to rigorously sort profitable entrustments, profitability has been stable.

Databases and Other

Databases and Other provides web-based IR support services via IR-Pro, a comprehensive support system for corporate IR activities that provides information on shareholdings revealed through reports on the possession of large volume and publicly offered domestic and overseas investment trusts, and the Analyst Network, which allows listed companies to accept reservations for IR explanatory meetings and manage attendee information in a single step. IR Japan also operates the *Kabunushi-Hiroba*, a survey system for individual investors.

Sales from Databases and Other for the fiscal year under review increased 1.7% from the previous fiscal year.

3) Seasonal fluctuations

The Group's quarterly net sales tend to be concentrated in the first and second quarters because of the nature of the core business, IR/SR Consulting services. These services are usually in great demand around June, when Japanese companies organize shareholder meetings. Recently, however, opportunities for recording net sales have grown also in the third and fourth quarters, and the customary seasonal fluctuations are tending toward flattening out, thanks to large-scale service demand distributed evenly throughout the year, as well as to the investment banking business and the stock transfer agency business, both of which are non-seasonal operations.

[Application of Revised Implementation Guidance on Recoverability of Deferred Tax Assets]

Effective from the fiscal year ended March 31, 2017, the Company has adopted the “Revised Implementation Guidance on Recoverability of Deferred Tax Assets” (ASBJ Guidance No. 26, March 28, 2016).

Changes in Accounting Estimates

Discontinuance of Directors’ Retirement Benefits System

Although the Company has accumulated a reserve to provide for payment of directors’ retirement benefits based on the regulations regarding provision for directors’ retirement benefits, the Board of Directors resolved at a meeting on March 16, 2017 to discontinue the directors’ retirement benefits system. The Company plans to propose the payment of termination benefits in conjunction with the discontinuance of the system at the Annual General Meeting of Shareholders scheduled to be held on June 26, 2017.

As a result, the difference between the initially estimated amount and the actual amount has been recorded under extraordinary income as “reversal of provision for directors’ retirement benefits.” Accordingly, profit before income taxes for the fiscal year under review increased by ¥96,071 thousand.
